

## Heavy Duty Thermal Compound

### IROX#K3

Specialty thermal compound designed for heavy duty heat transfer applications where amount of heat generation is very high & continuous. IROX# K3 has high thermal conductivity so immediately transfer heat at optimum speed. Extremely suitable for high wattage LED bulbs, street lamps & high end electronic applications. In-spite of very high temperature IROX#K3 never dries or there is no oil separation even it's used for continuous operations. IROX #k3 has excellent bonding to metals & nonmetals even at extreme temperatures of above 330°C

#### Benefits

- Thermal Conductivity: 2.4 W/MK
- Temperature Resistance : 330°C
- No evaporation loss even at high operating temperatures
- No high temperature drying
- Does not leave the surface even at high temperatures
- No drying even at 330°C
- No Oil Separation

**Method of Use:** By Hand Application, Stamping Or Screen Printing

**Packing:** 1 Kg, 6 Kg, 18 Kg
